

AVIATION FIRST-AID

we are care

**FIRST-AID
TRAINING
CENTER**

Since 1993

**CALMNESS IN
EMERGENCIES**

**EXPERTISE IN
ACTION**

**ASSURANCE IN
SAVING LIVES!**

Ensuring safety in the skies requires vital first aid knowledge. This training is designed to enable cabin crew and aviation personnel to respond quickly and effectively in emergencies. Covering scenarios from passenger discomfort to critical medical emergencies, the program teaches the right steps to take in every situation. Topics include basic first aid, CPR (cardiopulmonary resuscitation), shock management, and the use of medical equipment onboard aircraft.

Empower yourself with knowledge to save lives and make a difference in the skies!

WHO CAN BENEFIT?

THIS FIRST AID TRAINING, DESIGNED FOR AVIATION PERSONNEL, IS SPECIFICALLY TAILORED FOR THE FOLLOWING GROUPS:

Cabin Crew (Flight Attendants): Responsible for ensuring passenger safety and health during emergencies onboard.

Pilots: Cockpit crew who may encounter medical emergencies during flights.

Ground Handling Staff: Teams capable of addressing passengers' health issues before and after flights.

Aviation Operations Personnel: Those requiring medical knowledge at every stage, from flight planning to crisis management.

Medical Escorts and Health Professionals: Professionals providing medical services onboard aircraft.

Aviation Enthusiasts and Aspiring Professionals: Individuals planning to work in this field and aiming to enhance their skills.

With this training, everyone in the aviation sector can gain significant skills both individually and professionally!
